

Event History

OneView captures and displays the event history for each user and asset. Event History holds valuable information such as hours of service (HOS) records, job status updates, stops made, and scanned forms. Users can access event histories for any asset category; however the information captured in this section will be slightly different depending on the asset category.

Accessing Event History

The Event History section can be accessed the following way, regardless of asset category. The screen shots below reflect a user's event history.

1. Locate the asset or user from the tree on the left hand side of OneView and click on it.

2. Click on the Event History tab.

The screenshot shows the OneView Event History page for asset 'Pedigree - CO - 160'. The 'Event History' tab is selected. The page displays a table of events with columns: Start Time, Event Type and Title, Related To, and Duration. The table shows four events from May 22, 2018.

User Forms

It is important to note that any forms that a user fills out will not show an event in their event history. You will have to find them either in the Inspections tab for inspection forms, or on the forms tab. If it was a maintenance form or a job form, you can also find those in the job history and maintenance history.

Inspections Tab

(asset inspections can be found on the Inspections tab of the asset or the user who filled out the inspection)
